SUMMARY

Object-Oriented Analysis, Design and Development / Relational Database Systems

- *Innovative software engineer offering four years of experience in the full software development lifecycle – from concept through delivery of next-generation applications and customizable solutions.*
- *Expert in advanced development methodologies, tools and processes contributing to the design and rollout of cutting-edge software applications.*
- *Known for excellent troubleshooting skills – able to analyze code and engineer well-researched, cost-effective and responsive solutions.*

SKILLS

iOS Native Development	Agile/Scrum	Windows Azure
ASP.NET C#	Node.js	UX/UI Design
JavaScript	Web Api Design	SQL Azure
Microsoft SQL Server	Mobile Applications	Cloud Development

EXPERIENCE:

GM Security Technologies
07/2015 – 07/2016
Software Developer
Projects: EBT Fraud System
- An ASP.NET MVC application for government agencies scan for fraud in the transactions.
- Design store procedures based on the given Business Rules the government agencies that want to detect fraud.
- Design unit testing for store procedures
- Design the Reports using SQL Server Reporting Services and wire them to the Web App.
- Experience with SCRUM methodology using JIRA, solving bugs and adding features in versioning in development, staging and production environments.
- Developed a system for email alerts for databases issues and weekly status report in SQL Server 2014

Technologies: SQL Server 2014, Reporting Services, Business Intelligence, C# Web Api, JIRA Versioning

Microsoft
01/2014 - 07/2015
Developer Evangelist Intern
Projects: Jumpstart Program Website (Later renamed to a latam program)
- Worked with startups on their products like Tec2pay (a POS Windows Application) and Tec2Scan (a Windows Scanning software for Medical Records).
- Worked with Node.js Rest API for startups
- Organized the first Microsoft Hackathon in Puerto Rico for .Net developers.
- Used the Visual Studio Team Services for source control, issues, bug tickets and Agile Methodology
- Worked closely with the New Technology Director in Latam Market during each implementation with startups.

Technologies: .NET Framework, Node.js, MongoDB, C#, ASP.NET, Microsoft Azure (Websites, Virtual Machines, Hubs, Storage Blobs), Visual Studio Team Services.

Dgmed Technology Inc.
01/2013 - 01/2014
Software Developer
Projects: DGHospice
- An iOS application version of the medical Record HospiceCare.
- Designed the interface that talked with the web api to ensure the synchronization of records on real time using Web Sockets and Rest Api and a few modules like the PDF and Image Exporters.
- Developed the backend api for the sms verification system that communicates with the application.

Technologies: MSSQL, Microsoft Azure and Mobile Applications for iOS using Swift/Objective-C/JavaScript
